(Research Mentor)

I have consulted with my faculty sponsor about my intention to stand for Honors in Chemistry. I understand that in order to achieve departmental honors in Chemistry, I must maintain at least a 3.3 GPA in all of my chemistry (CHM) courses, have performed at least 1.0 unit of research in the department, complete both semesters of CUE: Chemistry Seminar, submit an honors thesis at least one week prior to my presentation, make a public presentation of my work, and defend my work to the faculty. I understand that I will not automatically be awarded honors just by completing the above steps; my work must be deemed meritorious by the faculty.
